What TCTAP 2025 Provides

First held as an Angioplasty Summit in 1995, TCTAP has been driving discoveries, innovations, and initiatives that contribute to the advancements in the field of interventional cardiology over the period. This year marks the 30-year milestone of TCTAP and we are pleased to invite you to be part of this momentous occasion. Join us in Seoul as we celebrate the 30th anniversary, promising to be the most exciting and impactful edition in the history of TCTAP.

- Examine the latest clinical investigations that provide guidance for the optimal management of patients with Coronary and Structural Heart Disease.
- Grasp the most sophisticated interventional techniques and devices associated with patient care in the Coronary, Endovascular, and Structural Heart Disease.
- Compare all applicable approaches to treat the same type of lesion, and suggest ideal treatment options for patients in clinical practice.
- Review challenging cases and abstracts submitted worldwide and learn numerous treatment strategies from the discussion with highly renowned experts.
- Integrate adjunctive pharmacologic management in treating patients with cardiovascular disease and patients who underwent intervention therapies.
